Demo: <https://penocw.cs.kotnet.kuleuven.be:80#/demo-task-44?0xjwkkslam9>

Files reviewed: barcodeScanner/main.js; screenDetection/image.js

Code reviews improve the overall quality of the work. Both from a design perspective and code quality (high cohesion, low coupling perspective). Indicate what improvements you recommended, what bugs you caught, ... What can be found in a code review:

- *bugs*
- *bad design (code and architectural)*
- *indicate insufficient testing*
- *security problems (relates back to bad design/unwanted functionality *joke: it is not a security bug, it is a feature*)*
- *...*

You could list snippets of code or make diagrams to illustrate what you mean.

1. Correct the usage of `var` to `const` and `let`, see ... (good reference).
2. The algorithm XYZ in file ZZ.js calculates the wrong answer in case of ...
3. ...
